PROFESSIONAL SUMMARY

Lead UX Designer with 14+ years designing expert-user enterprise software across nine sectors — investment banking, healthcare, pharmaceutical supply chain, telecom, GDPR / data protection, e-commerce, kiosk retail, enterprise IT, and food service. Most recently sole UX designer for a tier-1 investment bank's market-risk platform under FRTB, IMA DRC, and Basel III. Previously founding designer at 9ine Consulting (cybersecurity / data protection for hundreds of schools) and Associate UX Manager at Koru UX (managed twelve reports). Specialise in design systems from blank page, complex information architecture, and translating regulatory and technical constraints into interfaces expert users adopt.

PROFESSIONAL EXPERIENCE

Lead UX Designer

Mar 2023 – Present

Wipro (Permanent) — London, UK (Hybrid)

- Sole UX designer for a tier-1 investment bank's market-risk platform spanning four interlocking products under FRTB, IMA DRC, and Basel III (engagement Mar 2023 – Jun 2026); served analyst, methodology, and compliance teams.
- Modernised a 10-year-old legacy desktop tool: replaced modal handoffs with adaptive, context-aware components and progressive disclosure patterns.
- Validated redesign in Figma prototype testing (n=5 senior analysts): 60% reduction in clicks for standard daily setups, 40% task-completion lift.
- Propagated the design system across three adjacent market-risk products; specified WCAG 2.2 AA requirements across complex data tables and inputs.
- Translated FRTB/Basel III regulatory and technical requirements into designs analysts use daily, working directly with project managers, business analysts, and engineering.

Lead UX Designer · Founding Designer

May 2020 – Dec 2022

9ine Consulting — Remote, UK / India

- Founding designer for a multi-module cybersecurity and data-protection platform deployed across hundreds of schools (UK independents, MATs, US, international, UAE).
- Architected the design system from blank page; designed eight modules covering Governance, Privacy & Data Protection, Retention Management, Contact Management, Incident Management, Project Management, System Management, and in-app Training (9ine Academy).
- Designed a four-tier permission architecture (End User → School Admin → Group Super-admin → 9ine Consultant) with subscription-based module gating.
- Helped 9ine pivot from consulting service to SaaS product; applied UK GDPR, Data Protection Act, RoPA, and DPIA frameworks to information-architecture decisions.
- Led a 5-person team (3 designers, 1 video editor, 1 graphic designer); established the design-to-development handoff process the team retained after my departure.

UX Consultant

Jun 2018 – May 2020

Capgemini — Pune, India

- Solo UX consultant on four enterprise projects for global clients: server management, system management, data-centre tooling, and an internal food-ordering app.
- Architected a design system from scratch; unified component library that compressed development cycles for new features.
- Facilitated stakeholder workshops to resolve usability challenges and prioritise scope for major releases.

Associate UX Manager (progressed UI Designer → Senior UI Designer → Lead UI/UX Designer → Associate UX Manager) Apr 2014 – May 2018

Koru UX Design — Pune, India

- Managed twelve reports (seven designers, five developers) on 16+ projects across finance, healthcare, telecom, pharma supply chain, ecommerce, kiosks, and Windows desktop applications.
- Telecom GOC ticket-management redesign — SUS 52 → 83 across pre/post sessions on a 467,000-ticket-per-year system spanning Mumbai, Manila, and Denver operations centres.
- Clinical inventory module redesign — SUS 49 → 72; staff adoption from 22% to 82% across a multi-hospital healthcare network.
- Banking CRM modernisation — component library carried forward to dispute, credit, and deal-management surfaces; pharma Track & Trace state machine adopted as shared engineering / QA / customer-facing vocabulary.
- Championed adoption of formal usability testing across the agency; established the SUS-driven validation cadence used on subsequent engagements.

Graphic & Web Designer / Developer

Apr 2012 – Mar 2014

Advantage Advertising — Pune, India

- Solo visual generalist: print collateral, web banners, animation, and photography for advertising clients. Developed typography, composition, and rapid-iteration fundamentals applied throughout subsequent UX work.

SKILLS & TOOLS

UX & research: User research, contextual inquiry, journey mapping, personas, heuristic evaluation, usability testing, SUS / quantitative validation, information architecture, state machines, expert-user UX, complex-workflow design.

Design systems: Component libraries, design tokens, governance, documentation, design-to-engineering handoff.

Leadership: Team mentorship, hiring, stakeholder management, cross-functional collaboration with product / engineering / QA, workshop facilitation, Agile / Scrum.

Tools: Figma, Sketch, Adobe XD, Axure, Miro, Jira, GitHub.

DOMAIN & REGULATORY EXPERTISE

FRTB, Basel III, IMA DRC ETL, UK GDPR, UK Data Protection Act, RoPA, DPIAs, pharmaceutical Track & Trace serialisation, healthcare clinical inventory, WCAG 2.2 AA accessibility.

EDUCATION

Bachelor of Computer Applications

2008 – 2011

Maharashtra Institute of Technology (MIT ACSC), Pune, India

Advance Diploma in VFX and Animation

2011 – 2014

Frameboxx Animation and Visual Effects, Pune, India
